Sacramento CA 95814

**Purpose of this report**

*The purpose of this report is to provide performance outcomes data on consumer satisfaction (using items from the 28-item Mental Health Statistics Improvement Program Consumer Perception Survey (MHSIP)) and quality of life (QOL), as measured by the California State Department of Mental Health's Adult Survey. This report is a REGIONAL summary of the Adult Survey (see Attachment A) data that were collected during the November 3-17, 2003 survey period. To assist with the interpretation of this summary report, brief narratives are provided before each table presented. County reports that are similar to this REGIONAL report can be downloaded from each county's Information Technology Web Services (ITWS) folder, which can be accessed by authorized ITWS users at <https://mhhitws.cahwnet.gov/>.*

## Consumer Demographic & Descriptive Items

### Summary Report

The following tables highlight the Adult Survey demographic items, as well as several additional descriptive items, that were reported by consumers who received services during the November 3-17, 2003, survey period and reflect aggregated Regional data. Results of these Adult Survey consumer-completed items are highlighted in yellow (missing data are highlighted in green), and exclude surveys that had all items missing on either the MHSIP portion of the Adult Survey, the QOL portion, or both. **Out of 2,080 Superior Region Adult Surveys submitted, a total of 1,432 had valid data.**

**TOTAL NUMBER OF SURVEYS SUBMITTED (SUPERIOR REGION)**

A total of 2,080 Adult Surveys were submitted for the Superior Region.

## **MHSIP Consumer Survey**

### *Summary Report*

#### **About the MHSIP Consumer Survey**

The MHSIP is a 28-item consumer-completed survey designed to obtain participant perceptions of 1) access to services, 2) quality and appropriateness of services received, 3) consumer participation in treatment planning, 4) service outcomes and 5) general satisfaction. The MHSIP was developed through the collaborative efforts of the federally funded Mental Health Statistics Improvement Program ([www.mhsip.org](http://www.mhsip.org)), and included the direct assistance and feedback of consumers and their families, as well as advocates for mental health services. The MHSIP Consumer Survey is currently used in a number of states across the United States.

It is important to remember that the ratings on the MHSIP represent a participant's perceptions. Some data exist to suggest that satisfaction with services, in and of itself, does not necessarily correlate with outcomes. However, the MHSIP provides a good source of information to ensure that consumers have the opportunity to shape and improve their services.

The following tables present REGIONAL data that were collected and aggregated from the MHSIP portion of the November 2003 Adult Survey. The MHSIP items are rated on a five-point scale, with "5" indicating the greatest satisfaction.

The items that comprise each of the MHSIP subscales (i.e., access to services, quality and appropriateness of services received, consumer participation in treatment planning, service outcomes and general satisfaction) were averaged and then grouped into the following categories:  
 1.0 - 1.5 = 'Dissatisfied', 1.5001 - 2.5 = 'Somewhat Dissatisfied', 2.5001 - 3.5 = 'Neutral',  
 3.5001 - 4.5 = 'Satisfied' and 4.5001 - 5 = 'Very Satisfied'. As a general guideline, an overall scale score over 3.5 indicates that consumers were satisfied.

Additionally, the average scores for each of the MHSIP subscales are also reported below.

For the tables reflecting categorical groupings of the MHSIP averages and the MHSIP subscale averages, total frequencies may differ depending on how well consumers completed the items on the Adult Survey that comprised each scale's calculation. Averages were only calculated for those Adult Surveys where at least 2/3 of the items in the particular domain were completed (i.e., only 1/3 of the items could have data missing). The results are highlighted in yellow (incomplete and/or missing data are highlighted in green).

**PERCEPTION OF ACCESS TO SERVICES**

For the consumers who completed at least 2/3 of the items that comprise the “Perception of Access to Services” subscale, 32.3% reported that they were Very Satisfied, 46.8% reported they were Satisfied, 16.9% were Neutral, 3.6% were Somewhat Dissatisfied and 0.4% were Dissatisfied. Additionally, 3.7% of the data on this subscale had at least 1/3 of the items missing.

**Perception of Access to Services**

Total		1432	100.0		

## AVERAGE MHSIP SUBSCALE SCORES

Average scores were calculated for the consumers who completed at least 2/3 of the items that comprise each of the subscales. Respondents indicated that, overall, they were “Satisfied” with their Access to Services (indicated by a subscale score of 4.10; 1,379 responses), the Quality & Appropriateness of their treatment (indicated by a subscale score of 4.10; 1,347 responses), their Participation in Treatment Planning (indicated by a subscale score of 4.05; 1,282 responses), their Outcomes (indicated by a subscale score of 3.71; 1,318 responses) and were Generally Satisfied with their services (indicated by a subscale score of 4.23; 1,396 responses).

**Descriptive Statistics**

## Quality of Life (QOL)

### Summary Report

#### About the QOL

The QOL is designed to measure quality of life from a consumer's self-reported perspective. The subscales measured include: general life satisfaction, living situation, daily activities and functioning, family and social relationships, finances, legal and safety, and health.

It is important to remember that the ratings on the QOL represent a consumer's perceptions. A variety of factors can affect a consumer's quality of life and many of these are out of the control of service providers. However, in our efforts to continually improve services, the QOL can be used as a source of information on issues that are important to consumers.

The following tables present REGIONAL data that were collected and aggregated from the QOL portion of the November 2003 Adult Survey. Most of the QOL items are rated on a seven-point scale, with "7" indicating the greatest satisfaction regarding their quality of life. Some of the results reflect the frequency reported for particular QOL items while others reflect averages of the items that comprise each of the QOL subscales (i.e., general life satisfaction, living situation, daily activities and functioning, family and social relationships, finances, legal and safety, and health). Using the seven-point response options as a guide, the QOL subscale results can be interpreted using the following: 1.0 – 3.9 = 'Dissatisfied', 4.0 - 4.9 = 'Mixed' and 5.0 – 7.0 = 'Satisfied'. As a general guideline, an overall scale score over 5.0 indicates that consumers were satisfied. For the tables reflecting the QOL subscale averages, total frequencies may differ depending on how well consumers completed the items on the Adult Survey that comprised each scale's calculation. Averages were only calculated for those Adult Surveys where at least 2/3 of the items in the particular domain were completed (i.e., only 1/3 of the items could have data missing).

All QOL results are highlighted in yellow (incomplete and/or missing data are highlighted in green).

#### GENERAL LIFE SATISFACTION

For the consumers who responded to the question – "How do you feel about your life in general?" – 6.4% were Delighted, 13.6% were Pleased, 22.2% were Mostly Satisfied, 35.0% were Mixed, 8.8% were Mostly Dissatisfied, 10.1% were Unhappy and 3.5% were Terrible. Additionally, 8.2% of the consumers did not respond to this item.
